

## Champion Security Installations: Suppliers of High Accuracy Thermal Body Temperature Measurement Solutions

High Accuracy Thermal Body Temperature Measurement Solutions can assist with Fever Screening by detecting elevated body temperatures in large groups of people, in under 1 second, with accuracy up to  $\pm 0.3^{\circ}\text{C}$ .

In addition, thermal cameras have long range detection and temperature measurement capabilities, allowing them to be used in conjunction with visible light cameras to achieve all-weather, comprehensive surveillance.

### Solution Key Points:

- High Accuracy;  
Temperature measurement accuracy:  $\pm 0.3^{\circ}\text{C}$
- High Accuracy; Efficiency improved by 800%
- Safe & Contactless Measurement;  
Max. measurement distance: 3m
- Multi-target Measurement;  
Up to 30 targets detection at the same time
- Intelligent Analysis;  
Face mask detection accuracy: > 95%
- Flexible to Deploy;  
Easy installation and flexible deployment

All our engineers are fully DBS checked and provide a thoroughly professional and efficient service.
